

ARIB Activity and Strategy

22nd August 2017

Kohei SATOH

Association of Radio Industries and Businesses (ARIB)

satoh@arib.or.jp

■ Establishment

- 15 May 1995 as a public service corporation
- By merging two organizations, RCR and BTA, who had worked on standardization from 1985 to 1995.

RCR : Research & Development Center for Radio Systems

BTA : Broadcasting Technology Association

■ Objectives

- To develop technical standards for radio systems as “ARIB Standards”
- To conduct study and R&D for utilization of radio waves
- To conduct correspondence, coordination and cooperation with foreign organizations

■ Members (as of 4 August 2017)

- Regular members : 187
 - Telecom Operators : 8
 - Broadcasters : 18
 - Manufactures : 133
 - Others : 28
- Supporting members : 24

■ Study/R&D - **Standardization**

- work on telecom (Radio) & broadcasting fields
- develop Standard by consensus

■ Promotion of Radio Industry

- hold special seminars, monthly seminars
- issue yearbook, quarterly bulletin, weekly news

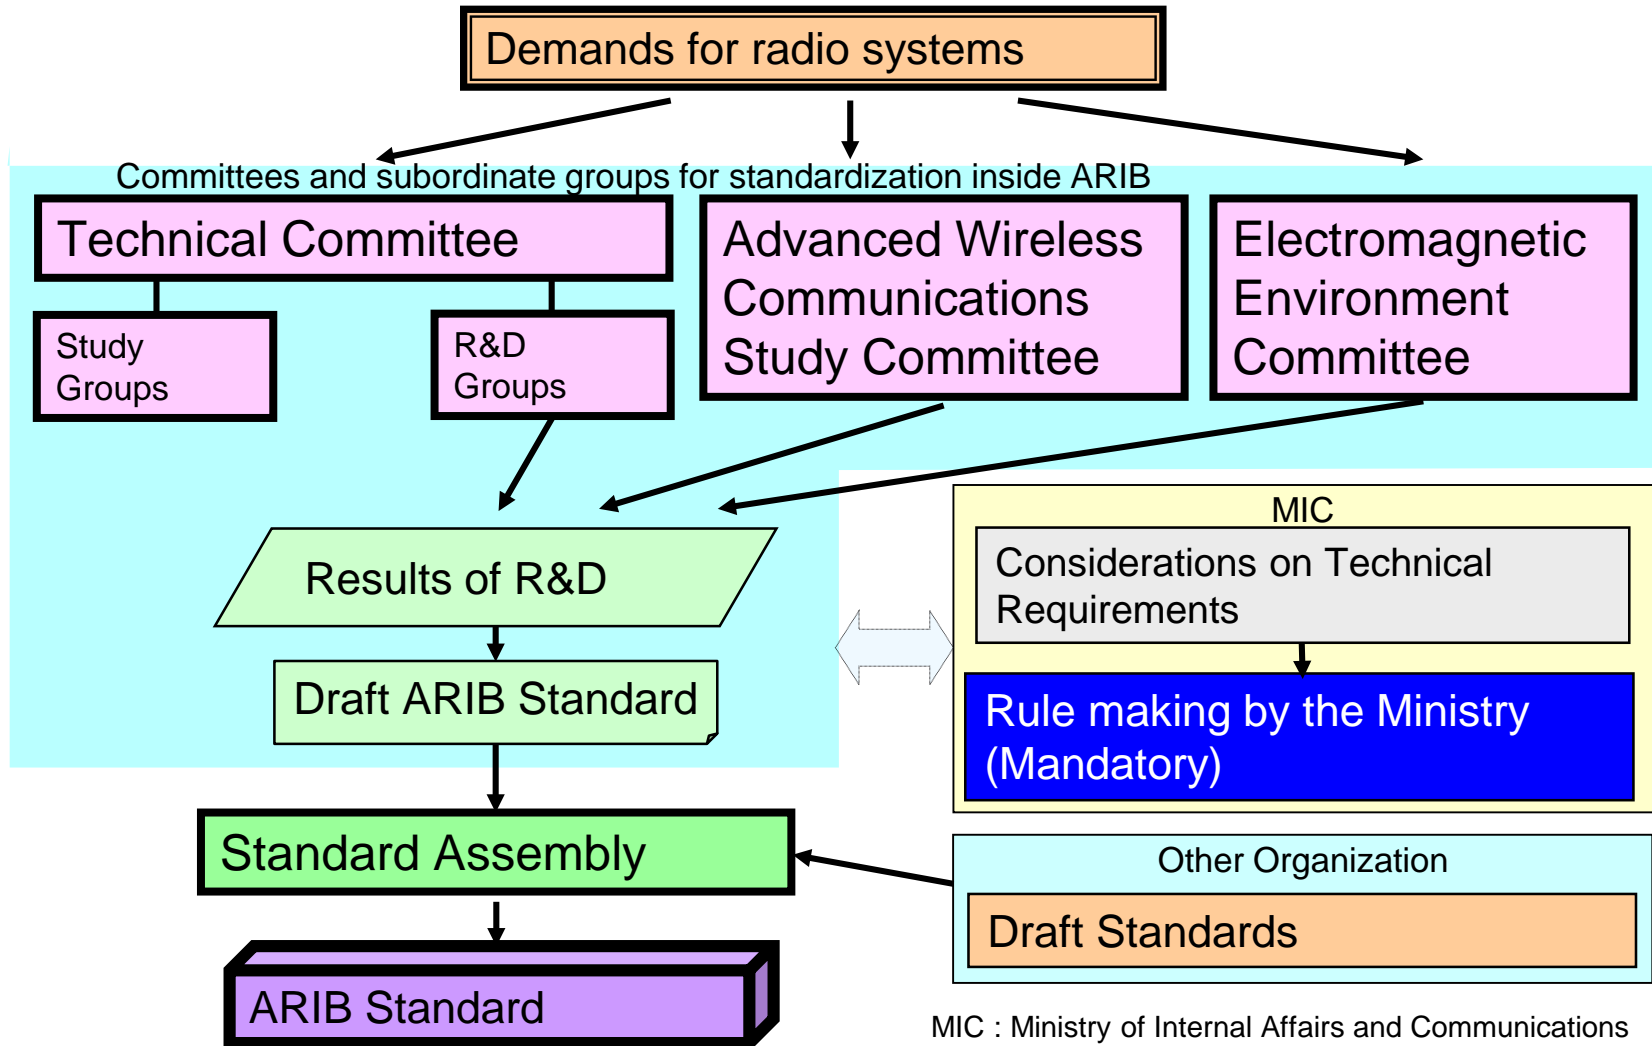

■ Consultation on Radio Wave Use

- design radio links / select best available frequency for microwave and satellite links

■ Cooperation with SDOs

- having MoU and Agreement with 16 organizations world wide

Standardization Flow

■ Big three issues

- 5G** : Collaborate worldwide through 5GMF
- UHDTV** : Promote the system worldwide
- ITS** : Harmonized (co-existence of ITS standards, ITS and other systems) frequency bands for the implementation of evolving ITS

■ Close cooperation with Fora / Consortia

- draft standard with complete specification
- full IPR submission
 - gathering and analyzing information on IPR policy
- English Version of ARIB Standards

- **Establishment of 5G Trial Project Promotion Center**
 - **Actively involved in the 5G Field Trial led by MIC**

- **Development of New Wireless Access System towards IoT**

- **Development of Advanced private wireless communication systems**

- **To facilitate collaboration and cooperation between ASTAP and AWG;**
 - e.g. Seamless access communication systems, IoT application/ services, security, etc.
- **To hold a round-table discussion involving developing countries on a specific topic;**
- **To develop recommendations rather than reports in the APT work programs; and**
- **To keep the appropriate interval between ASTAP and AWG meetings more than one month.**

A decorative graphic on the left side of the slide consists of several overlapping squares in shades of blue and grey. A large, solid blue horizontal bar spans across the middle of the slide, containing the text.

Thank you for your attention!

Supplementary Slides

[as of 31 March, 2017 (31 March, 2016)]

- **Membership**
 - Regular Member : 189 (195)
 - Supporting Member : 13 (4)

- **Standardization**
 - Standard (STD) : 165 (166)
 - Technical Report (TR): 70 (66)

- **Technical Committee**
 - Study Group : 1 (3)
 - R&D Group : 4 (4)

- **Advanced Wireless Communications Study Committee (ADWICS)**
 - Subcommittee : 4 (4)

- **Promotion Strategy Committee**
 - Subcommittee : 1 (1)
 - ISDB-T : 19 countries (18)
 - (new : El Salvador, January 2017)

- **Electromagnetic Environment Committee**
 - Subcommittee : 2 (2)

Secretary General : Mr. Fusaki MATSUI
Managing Director : Mr. Shunsuke KODAMA
Executive Director : Dr. Shigeki MORIYAMA
Executive Director : Mr. Seiji NISHIOKA

Administration Department

- General Affairs
- Personal Affairs
- Accounts

R&D Headquarters

- Investigation and R&D
- Development of Technical Standards

Development Center

5G Trial Project Promotion Center

9 Groups

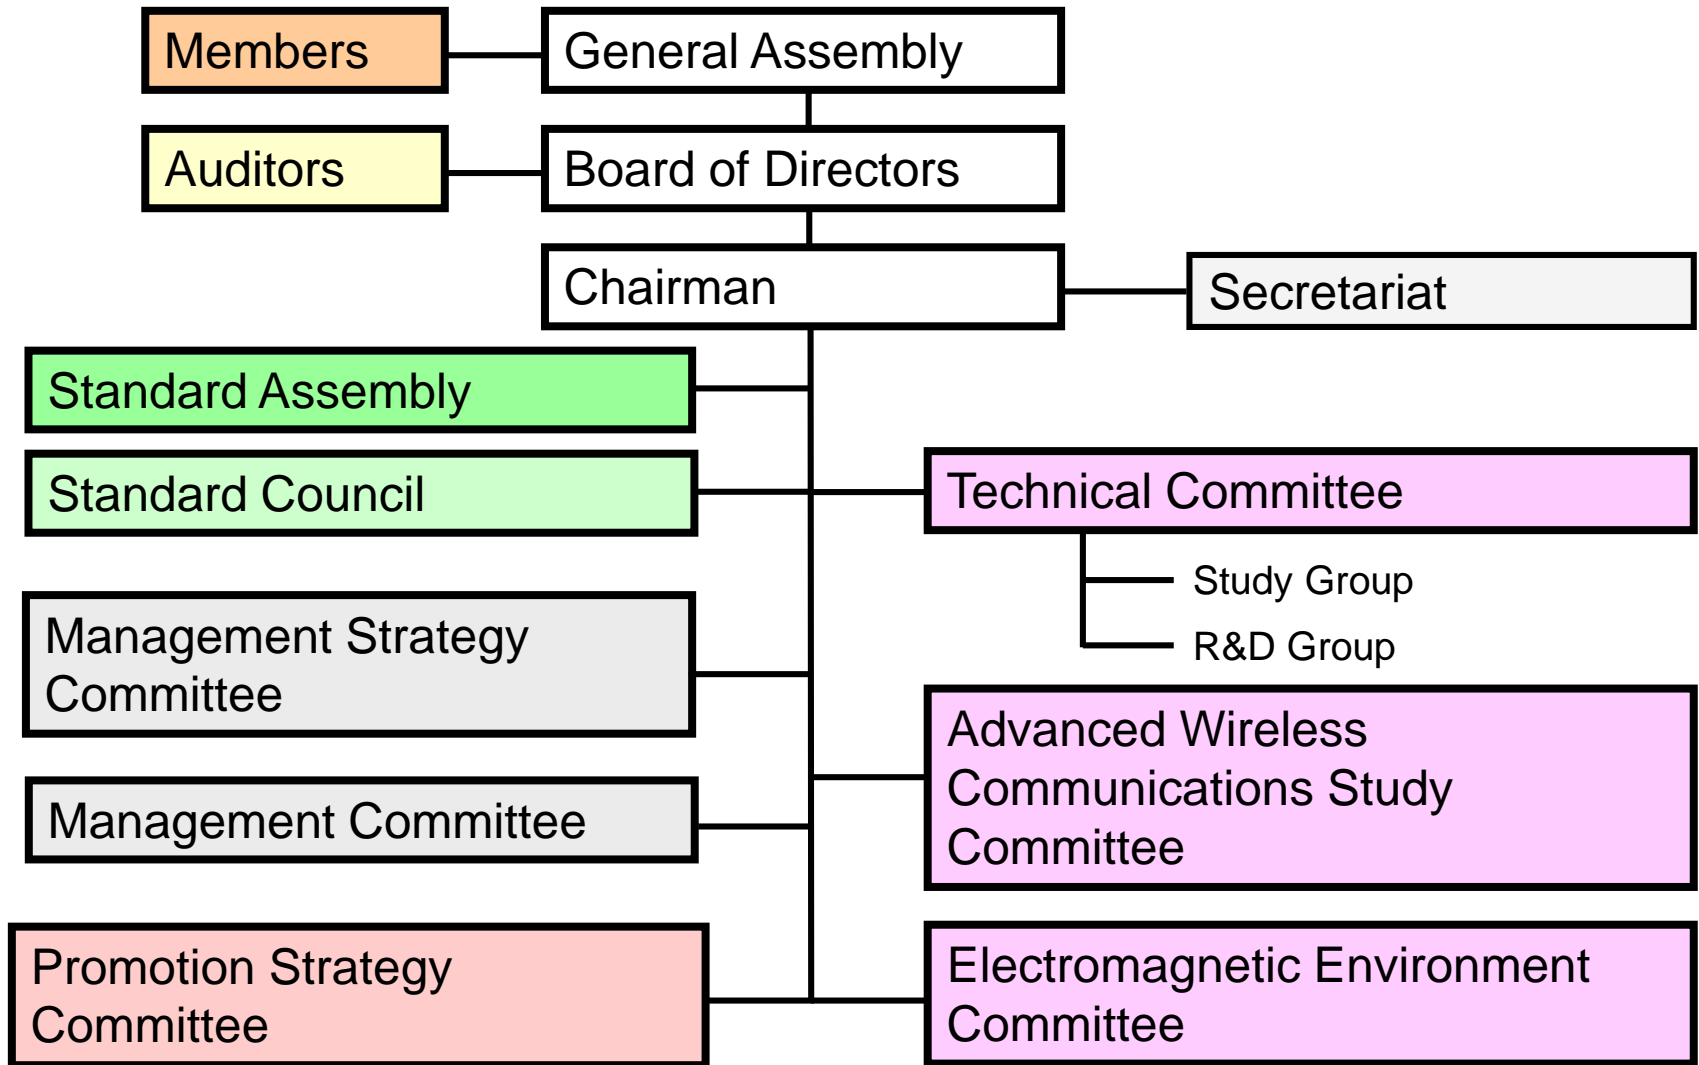

Radio Utilization Consulting Department

- Consultation and Information Services for Spectrum Utilization

Planning and International Affairs Department

- Administrative work related to “ARIB Standards”
- Education and Popularization
- Correspondence with other national/international standards organizations

Structure of ARIB

■ Establishment

- May 1995

■ Operation

- To ensure fairness and transparency
- To set standards by consensus

■ Membership

- Open to any entity, organization and person
- Independent from ARIB membership
- Members : 168 (as of 4 August 2017)
 - Telecom Operators: 7
 - Broadcasters: 14
 - Manufactures: 126
 - Others : 21

■ Holding period

- 4 times a year

- **ARIB Standard (STD)**

- Technical requirement for radio systems

- **ARIB Technical Report (TR)**

- Operational guidelines for radio systems

- **Number of STD and TR**

[As of 31 March, 2017]

	STD	TR
Telecommunications	92	24
Broadcasting	73	46

- **ARIB Standard URL**
